

REMARKS

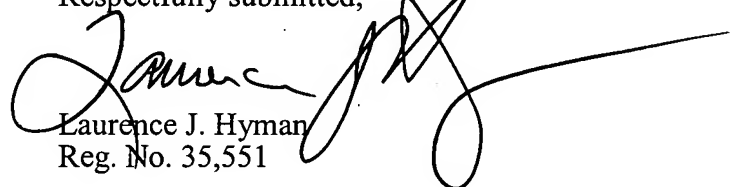

In the Office Action mailed June 21, 2007, the Examiner observed that the Sequence Listing of the instant application, submitted February 7, 2006, is missing SEQ ID NO:1, corresponding to the CD30 antigen. The Substitute Sequence Listing enclosed herewith has as SEQ ID NO:1 the CD30 sequence according to Durkop et al., Cell, 68:421-427 (1992). This sequence is referenced in the specification at page 14, lines 23-24 and incorporated by reference in the specification at page 74, lines 4-6. The Durkop et al. publication has therefore always been legally part of the specification. Applicants further note that the Durkop et al. publication has also been available in the scientific literature since 1992, and therefore has been available to persons of skill in the art at all times relevant to the subject application.

Entry of the amendment is respectfully requested. This amendment is accompanied by a disk containing SEQ ID NOS:1-41 in computer readable form, and a paper copy of the sequence information which has been printed from the disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, he is invited to telephone the undersigned at 415-576-0200.

Respectfully submitted,

Laurence J. Hyman
